ARCHAEOLOGICAL EXCAVATION

Corner of George & O'Connell Streets, Parramatta

Archaeological work is being undertaken on the corner of George & O'Connell Streets in Parramatta because it was previously occupied by the colonial British from the late eighteenth century. The focus of the work by Casey & Lowe and a team of archaeologists and volunteers is to excavate and record the remains of the 19th-century occupation. This work is being funded by the Attorney-General's Department as part of the redevelopment of the site for the new Parramatta Children's Court. The NSW Heritage Council has given approval for this work to be undertaken. As part of this project the remains of the 1790s convict hut will be retained underneath the new building.

Aboriginal History

Parramatta was occupied by the Darug Aboriginal people prior to the arrival of the British in 1788. The local clan group were the Burramatta and they spoken the Darug language. Parramatta is part of their traditional hunting and fishing grounds. Being near the river it would have been an important area for camping and fishing for 10,000 or more years. Fish were an important part of the diet of people living in the Sydney region in pre-colonial times. Aboriginal presence in Parramatta was documented by the British who set out from Sydney Cove to explore the Parramatta River and locate fertile land to grow the crops needed to sustain the new arrivals.

Colonial History

1788 to 1822

Governor Phillip sent out exploring parties to survey Sydney Harbour and the river at the head of the harbour shortly after landing at Sydney Cove. On Sunday 2 November 1788 Governor Phillip and others, including marines, established a military redoubt at Rose Hill. Convicts were sent to Rose Hill to commence farming as the land was more fertile than at Sydney or Farm Cove.

With the success of farming at Rose Hill, Phillip decided to expand the settlement. In 1790 Governor Phillip and Surveyor Augustus Alt laid out a town plan

with High Street (George Street) running between the planned site of Government House and the Landing Place a mile distant to the east along George Street.

Convict huts in George Street, 1793, with visiting Spanish naval officers. The large building (left) is the hospital.

As set out, George Street was 205 feet (63 m) wide and a mile (1.6 km) long. On either side of the street huts were to be erected, each capable of containing 10 persons, and at a distance of 60 feet (18.5 m) from each other, with a garden area allotted at the rear of each hut. The huts were to be built of wattle and daub and the roof thatched and were to be 12 by 24 feet (4 by 8 m). The convicts built the new street and the huts from July 1790. By September 1790 bricks were being fired for a barracks and store house, a wharf was built just at the east end of George street and 27 huts were being built along High Street (George Street).

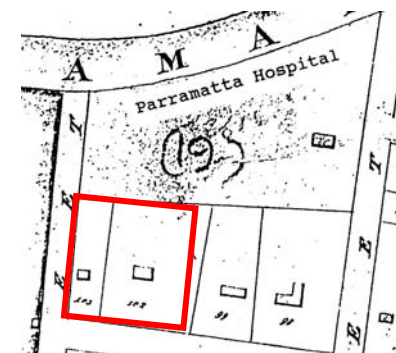

Painting by Evans, c1805 with fruit trees possibly planted by Anthony Landrin.

The archaeological remains of two convict huts aligned along George Street should survive within the study area and will be conserved for the future. These huts were still standing in 1822 (see Plan). In the

early 1810s these huts ceased to house convicts and were occupied by emancipated convicts or free settlers.

Background to Lot 102 and Lot 103

In June 1823 Governor Brisbane formally made leases of land in Parramatta. The householders residing on a property they had previously acquired unofficially could now apply for official title. It is presumed that the people who applied for the two grants within the study area were the then occupants.

Version of the 1822 plan indicating the location of convict huts within the study area.

In the eastern part was **Lot 102**. The earliest known occupant was Anthony Landrin, a French prisoner-of-war bought out to NSW to grow vines for winemaking. He obtained a lease in 1809 indicating that this hut had ceased to be used for convict housing by this time. Landrin was not very successful at growing vines but he also worked as a cooper at the nearby government cooperage (now within Parramatta Park). He apparently had planted fruit trees behind the house which may be shown in a c1805 painting. Landrin died in 1820.

Samuel Larkin resided in the house in Lot 102 by 1824. Larkin arrived as a convict in 1801 on the *Minorca*. By 1811 he was working in the Government Stores and by 1817 was Storekeeper at Parramatta but was eventually dismissed for bribery. Landrin and Larkin both worked for the government and appear to have easily obtained leases on land near to Government House and nearby work areas.

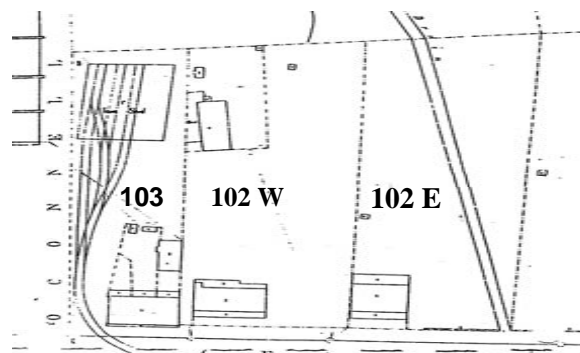

A cottage was later built on the street frontage in the western part of lot 102, possibly by Cordelia Larkin, Samuel's daughter, or by a later owner. This was a six-roomed brick house. **The remains of this house are being excavated and recorded by the archaeological program.**

In 1840 the Emu Brewery was built in Lot 102. It was not a successful venture, operating only intermittently. Patrick Hayes ran the brewery at one stage. It was one of two breweries working at this time in Parramatta. Hayes was caught making illicit spirits here in 1845. A wool washery operated here in the 1850s and spread the seeds of the Bathurst Burr along the river. James Galloway purchased the property in 1859 for £415 and retained ownership until 1891. **The remains of the brewery and wool washery are being recorded during the archaeological program.**

The western part of Lot 102 was inherited by Edgar Larkin after Samuel's death. This part of Lot 102 was vacant until the 1880s when it was owned by Cyrus Edgar Fuller, editor of the *Cumberland Mercury*. Fuller was declared bankrupt in 1893. The house was used as a boarding house in the 1880s and 1890s. **The remains of this house are being excavated and recorded during the archaeological program.**

The western corner property was **Lot 103**. It was leased in 1809 to John Blakefield, a 'public baker'. Blakefield arrived as a convict on the *Ganges* and reputedly died of a broken heart after his wife left him for a bushranger. Blakefield's son was looked after by William Beaumont who became the gaoler at

Parramatta Gaol. Charles Blakefield, the baker's son, did not get title to Lot 103 until 1859.

1894 plan showing later houses on the street frontage and the tram sheds at the rear.

A later owner, David Lennox Dalziell, possibly built five houses on George Street by 1865 (see above). These houses appear to be terraces. Three survive until the 1880s with the last two being demolished by 1928. **The remains of two of these houses are being excavated and recorded during the archaeological program.**

Lot 103 was purchased by Charles Edward Jeannerett in 1883 for the establishment of a tramway terminus for the new Parramatta tram. A later owner, Sydney Ferries, purchased western part of Lots 102 and 103 in 1901.

All land with the study area was resumed for the hospital. A maternity hospital opened here in 1956.

Research Questions

The archaeological evidence recorded from the site is expected to help us answer research questions which further our knowledge and understanding of the history of Parramatta. Among these questions are the following:

Material Culture of Convict Life

This explores how archaeological artefacts reveal the nature of convict life:

- Did the deprivations of a frontier life alter the way in which convicts and free people lived in early colonial Parramatta?
- Is there evidence of resistance by convicts to the way in which their life was ordered and structured by military control?
- Nature of early agricultural practices, evidence for dairying, fruit trees etc.
- Evidence for the construction of gender roles.
- Further our knowledge about early pottery manufacture and use in Parramatta.

Free Life in Colonial Parramatta

- What does the archaeological evidence tell us about cultural and social practices in colonial Parramatta, relating to how people lived and ate, the clothes they wore and the goods they bought?

Life in the Various Households

These questions seek to explore the social and cultural context and how it was represented in the houses and artefacts of Parramatta's residents.

- Order and amenity - do the layout of houses and other structures reveal specific details of cultural and social practices? What was the role of these practices in changing and modifying people's behaviour?
- Evidence for the nature of childhood.

SITE INSPECTION

Members of the public can visit the site on Friday 22 April between 2 and 3 pm. Book with Mary on 0419 683 152.
